

## What are the benefits?

By infusing ozone into water, you can create the strongest natural disinfectant available.

- Firm bristles for a deep massage
- Remove molting hair
- Even water spread
- Easy to clean
- Save water

## Handheld Pet Shower Brush

Saving water has become a serious issue in many countries. Of all the water found on earth, only a small fraction is available as potable liquid water. Agricultural pollutants and chemicals further deplete water quality and availability, which leaves less water available for human consumption and their recreational activities

It is estimated that by the year 2025, about 66% of earth's population will experience water shortage in one form or another.

By using the Handheld Pet Shower Brush with pause-control, you will splash out at least 40% less water, while having fun taking a shower with your favourite pet.
