# OzoFresh Ionizer

Ozone is 'made' from oxygen in the air. It is nature's most effective chemical-free way of eliminating bacteria, viruses, moulds and odours. With an active life of approximately 30 minutes it reverts back to oxygen and naturally freshens up the air.

## The Natural Cleaning Power of Ozone

The OzoFresh Ionizer is a safe, reliable and cost-effective generator of ozone and anions (negative ions) with a built-in timer. This portable unit can be used to purify your drinking water and to freshen the air around you.

It uses ambient air to generate safe amounts of ozone, nature's very own chemical-free disinfectant, sanitizer and deodorant, all in one. It will eradicate foul odours while it also kills airborne bacteria, viruses, spores, etc. that can cause disease, illness and allergies.
