Water-Pure Ozonator

The Water-Pure OZONATOR system is a complete, reliable and advanced ozone treatment system, engineered to produce high levels of dissolved ozone in the water to meet common disinfection and oxidation tasks. Ready-built for easy connection to a water tank (up to 22 000 L), the unit is pre-plumbed, pre-wired, and housed in an aluminum powder coated housing. Plug & play installation makes healthy living easy.

The new generation Water-Pure Ozonator is a compact Corona Discharge (CD) ozone generator suitable to disinfect and sanitize rain/roof water, tanks, ponds, water features, nutrient tanks, hydroponics and aquaculture.
